Revised January 1978

## PREFACE

The information set forth in this publication is compiled and amended annually by the Financial Management Staff of the National Cancer Institute and is intended primarily for use by members of the Institute staff, the principal advisory groups to the Institute and others involved in the administration and management of the National Cancer Program. Questions regarding any of the information contained herein may be directed to the Financial Manager, National Cancer Institute, 9000 Rockville Pike, Bethesda, Maryland 20014.

## NATIONAL CANCER INSTITUTE HISTORICAL DATA

### LEGISLATIVE HIGHLIGHTS

**March 7, 1928**—Senator M. M. Neely introduced S. 3554, “To authorize the National Academy of Sciences to investigate the means and methods for affording Federal aid in discovering a cure for cancer and for other purposes.”

**April 12, 1937**—Congressman Warren G. Magnuson of Washington introduced H.R. 6100, an identical bill to S. 2067.

**July 8, 1937**—A joint hearing of the Senate and House committees was conducted before a Subcommittee on Cancer Research, and a revised bill was written.

**July 23, 1937**—The National Cancer Institute Act was passed by Congress.

**August 5, 1937**—The National Cancer Institute Act, Public Law 244, 75th Congress, was signed by President Franklin D. Roosevelt, “To provide for, foster, and aid in coordinating research relating to cancer; to establish the National Cancer Institute; and for other purposes.” An appropriation of \$700,000 for each fiscal year was authorized.

**July 1, 1944**—The Public Health Service Act, Public Law 410, 78th Congress provided that “The National Cancer Institute shall be a division in the National Institutes of Health.” The act also revised and consolidated many revisions into a single law. The limit of \$700,000 annual appropriation was removed.

**December 4, 1970**—Senator Ralph Yarborough, Texas, introduced S. 4564, “A bill which would establish a National Cancer Authority for the purpose of devising and implementing a national program for the conquest of the world’s most dreaded disease—cancer.”

**January 22, 1971**—In his State of the Union Message, President Nixon announced that he would ask for the appropriation of an additional \$100 million to launch an intensive effort to control cancer, and that he would ask later for whatever additional funds could be effectively used.

**March through November 1971**—Hearings on proposed legislation relating to cancer research expansion were held by both House and Senate subcommittees.

**October 18, 1971**—The President announced that the Army’s Biological Defense Research Center

at Fort Detrick, Maryland would be converted into a leading center for cancer research as part of the major campaign to conquer cancer.

**December 7, 1971**—After three conference sessions that began on November 30, the Senate-House Conference Committee agreed on S. 1828.

**December 9, 1971**—The House passed the bill by voice vote.

**December 10, 1971**—The Senate passed the bill 85-0 and sent it to the President for signature.

**December 23, 1971**—The President signed P. L. 92-218, The National Cancer Act of 1971, providing increased authorities and responsibilities for the NCI Director; initiating a National Cancer Program; establishing a three-member President’s Cancer Panel and a 23-member National Cancer Advisory Board; establishing cancer control programs as necessary for cooperation with State and other health agencies, and providing for the collection, analysis, and dissemination of all data useful in the diagnosis, prevention, and treatment of cancer, including the establishment of an international cancer research data bank.

**January-February 1974**—Hearings were held on the proposed legislation to improve on the National Cancer Plan and to authorize appropriations for the next three years.

**July 23, 1974**—The National Cancer Act Amendments of 1974, P.L. 93-352, was signed. The Amendments: encourage the NCP to explore the role of nutrition in the treatment, rehabilitation, and causation of cancer; authorize the Director to include personnel needs in the budget estimate to OMB; remove the limit on the number of comprehensive cancer centers; increase the number of consultant/expert appointments to 100; and direct the NCI to provide and contract for a program to disseminate and interpret information respecting the cause, prevention, diagnosis and treatment of cancer.

**August 1, 1977**—The Biomedical Research Extension Act of 1977, P.L. 95-83, Title II, increased the number of consultant/expert appointments from 100 to 151.

## HISTORICAL EVENTS

- August 5, 1937** — President Franklin D. Roosevelt signed the National Cancer Act.
- November 9, 1937** — The National Advisory Cancer Council held its first meeting.
- January 13, 1938** — Dr. Carl Voegtlin was appointed the first Director of the Institute.
- October 31, 1940** — President Franklin D. Roosevelt dedicated Building 6.
- July 1, 1947** — NCI reorganized to provide for expanded program; intramural cancer research, cancer research grants, and cancer control activities.
- July 2, 1953** — NCI inaugurated a full-scale clinical research program in the new Clinical Center.
- April 1955** — The Cancer Chemotherapy National Service Center was established in the Institute to coordinate the first national, voluntary, cooperative cancer chemotherapy program.
- January 11, 1966** — NCI reorganized to coordinate related activities. The areas of three Scientific Directors were established: Etiology; Chemotherapy; and a group of discipline-oriented laboratories and branches referred to as General Laboratories and Clinics.
- February 13, 1967** — A Cancer Research Center was established in Baltimore USPHS Hospital to conduct an integrated program of laboratory and clinical research on the therapy and management of cancer patients.
- April 27, 1970** — At the request of Senator Ralph W. Yarborough, Chairman of the Committee on Labor and Public Welfare, the Senate approved the establishment of the National Panel of Consultants on the Conquest of Cancer.
- November 25, 1970** — The National Panel of Consultants submitted to the Senate Committee a report entitled "National Program for the Conquest of Cancer."
- October 18, 1971** — President Nixon converted the Army's former biological warfare facilities at Fort Detrick, Md., to research on the causes, treatment and prevention of cancer.
- December 23, 1971** — President Nixon signed P.L. 92-218, The National Cancer Act of 1971.
- June 22, 1972** — The Institute awarded a contract for the operation and maintenance of the Frederick Cancer Research Center at Fort Detrick, Maryland. This constituted the largest research contract ever awarded by a research component of the National Institutes of Health.
- June 30, 1972** — A team of five U.S. cancer scientists met with Russian scientists in Moscow to exchange information on cancer drugs. Dr. C. Gordon Zubrod, Scientific Director for Chemotherapy, NCI, on behalf of the United States, signed a U.S.-U.S.S.R. agreement for continued cooperation on the exchange of drugs, visiting scientists, and information.
- July 27, 1972** — A Bureau-level organization was established for the National Cancer Institute, giving the Institute and its components organizational status commensurate with the responsibilities bestowed on it by The National Cancer Act of 1971. Under the reorganization, the Institute was composed of the Office of the Director and four Divisions: the Division of Cancer Biology and Diagnosis; Division of Cancer Cause and Prevention; Division of Cancer Treatment; and Division of Cancer Grants.
- February 27, 1974** — The Division of Cancer Treatment completed negotiations with the University of Maryland to relocate the Baltimore Cancer Research Center within the University of Maryland Hospital Complex in Baltimore.
- September 10, 1974** — NCI established the Division of Cancer Control and Rehabilitation, which will plan, direct and coordinate an integrated program of activities regarding the widespread application of available and new methods for reducing the incidence, morbidity and mortality from cancer.
- July 1975**—The Division of Cancer Treatment was expanded to include the NCI Surgery and Radiation Oncology Branches and the extramural program of Cancer Cooperative Clinical Trials. The reorganization strengthened the Division's capabilities for conducting a national program of research on cancer treatment by combined modalities.

**DIRECTOR  
NATIONAL CANCER PROGRAM  
NATIONAL CANCER INSTITUTE**

July 29, 1977 TO PRESENT

**Arthur Canfield Upton, M.D.**

Dr. Arthur C. Upton was born in Ann Arbor, Michigan, February 27, 1923. He received his B.A. (1944) and M.D. (1946) degrees from the University of Michigan. After his residency in Pathology from 1948 to 1950, he became an instructor in Pathology at the University of Michigan until 1951. In 1951, Dr. Upton accepted a position as Pathologist in the Biology Division of the Oak Ridge National Laboratory, where, he was appointed Chief, Pathology-Physiology Section in 1954 and remained in that position until 1969. From 1969 to 1970 he was Chairman, Department of Pathology, State Univer-

sity of New York at Stony Brook. In 1970, he accepted the position as Dean, School of Basic Health Sciences at that institution, a position he held until 1975. Additionally, during the period 1969 through 1977 until his appointment as Director of the National Cancer Program, he was Attending Pathologist, Medical Department, Brookhaven National Laboratory and Professor of Pathology, State University of New York at Stony Brook. Dr. Upton maintains membership in many National Scientific Societies and was President of the American Association for Cancer Research (1963-1964), the Radiation Research Society (1965-1966), and the American Society for Experimental Pathology (1967-1968).

# NATIONAL CANCER INSTITUTE

**OFFICE OF THE DIRECTOR**  
**Dr. Arthur C. Upton, Director**  
**Dr. Guy R. Newell, Deputy Director**  
**Assistant Directors: Dr. Bayard H. Morrison III and Dr. Richard A. Tjalma**  
**Acting Assistant Director: Dr. John B. Moloney**  
**Acting Associate Director: Dr. William D. Terry**

---

Plans, develops, directs, and coordinates the activities and programs of the Institute and of the National Cancer Program; and provides overall administrative guidance and services.

**FREDERICK CANCER RESEARCH CENTER**  
**Dr. William W. Payne**

**OFFICE OF RESEARCH SAFETY**  
**Dr. William E. Barkley**

**OFFICE OF PROGRAM PLANNING AND ANALYSIS**  
**Mr. Louis M. Carrese**

Manages development of the National Cancer Program Plan, the annual 5-year plan, individual program plans, and the evaluation plan; analyzes programs of the Institute; evaluates resource needs for the National Cancer Program; develops and provides support for management and scientific information systems.

**OFFICE OF CANCER COMMUNICATIONS**  
**Mr. Paul Van Nevel**

Develops and manages the program communications activities of the NCI/NCP; interprets program and organizes, prepares and disseminates reports on cancer research for research institutions and other organizations participating in the NCP; maintains liaison with NCI constituents on behalf of the Director; responds to public inquiries; prepares and coordinates internal reports for dissemination within the Institute, the Executive Branch, and the Congress; and serves as a focal point for information on legislation.

**OFFICE OF INTERNATIONAL AFFAIRS**  
**Dr. Gregory T. O'Connor**

Plans, coordinates, and manages cooperative international cancer research activities and provides leadership within the National Cancer Institute for the development of international programs and activities.

**OFFICE OF ADMINISTRATIVE MANAGEMENT**  
**Mr. Calvin B. Baldwin, Jr.**  
**Executive Officer**

Directs, coordinates, and conducts administrative management activities of the Institute including: personnel, budget, contracts, and administrative services; advises Director on administrative management aspects of the program.

**PROGRAM ANALYSIS AND FORMULATION BRANCH**  
**Dr. Robert Love**

**SYSTEMS PLANNING BRANCH**  
**Vacant**

**PROGRAM LIAISON BRANCH**  
**Vacant**

**EDUCATION & TECHNICAL REPORTS BRANCH**  
**Mr. William S. Gray**

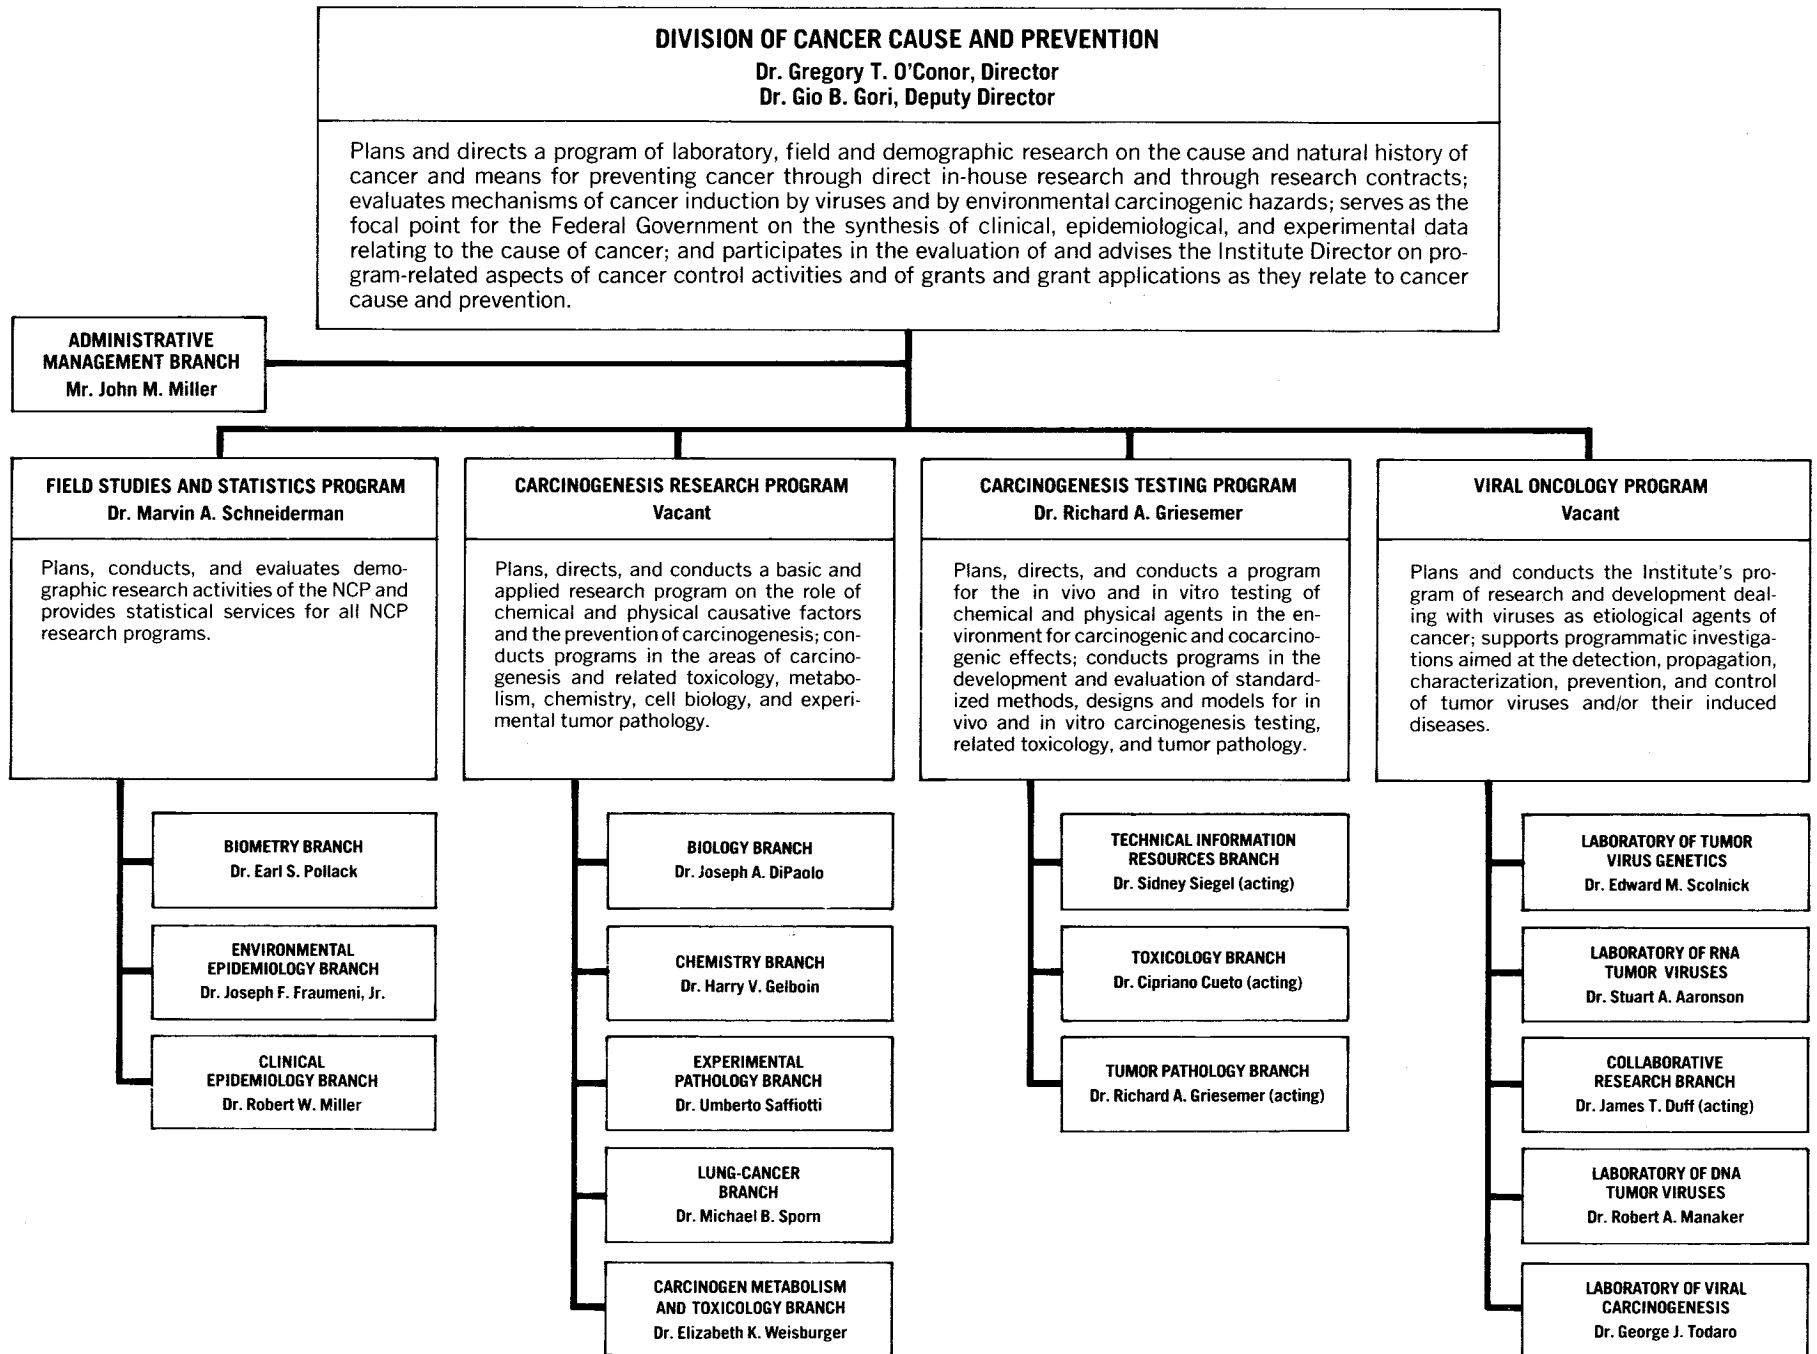

**ADMINISTRATIVE SERVICES BRANCH**  
**Mr. Thomas L. Kearns**

CANCER PROGRAM—FISCAL YEAR 1977**

**TOTAL: \$1,173,279,000**  
*1,172,337,000*

NCI portion represents actual 1977 obligations. Non-NCI portions are estimated.

## NATIONAL CANCER PROGRAM STRATEGY

The essential and continuing goal of the National Cancer Institute (NCI) is the same today as it was when the Institute was created by an Act of Congress 40 years ago: To develop the means for reducing the incidence, morbidity, and mortality of cancer. The NCI continues to be the lead federal agency in cancer, responsible and accountable for the investment of progress toward that goal. However, the National Cancer Act of 1971 (amended in 1974) brought about some changes which have had significant impact on cancer research. The most obvious impact has been that the level of support for cancer research and control activities with public funds has increased four-fold since 1971. But the mandate from Congress to intensify and expand the cancer effort has had other implications beyond the increase of resources for the National Cancer Program.

The 1971 Act created the National Cancer Program (NCP) and stated that, in carrying out the NCP, the Director of the National Cancer Institute shall, with the advice of the National Cancer Advisory Board, “. . . plan and develop an expanded, intensified, and coordinated cancer research program encompassing the programs of the National Cancer Institute, related programs of the other research institutes, and other federal and nonfederal programs.” Thus, the Act not only provided the public with both a symbolic and operational entity with which to identify at the national level, but also brought about a greater spirit and degree of awareness, cooperation, and coordination among federal programs and between federal and nonfederal programs than had existed before the creation of the National Cancer Program.

The National Cancer Program has three major program components:

- Research
- Control
- Support.

The first two components encompass the scientific and technical activities, while the support component includes those activities needed to carry out the research and control efforts effectively (e.g., construction, manpower development, and information activities).

The addition of cancer control responsibilities to NCI's research responsibilities and through the specific emphasis placed on the expansion of comprehensive cancer centers as focal points for research, teaching, and demonstration, served to further emphasize the axiom that the ultimate purpose of disease research is to produce results that can be translated into improved methods for the prevention and treatment of disease in people, and that the National Cancer Program would invest significant effort and resources in this area.

One important characteristic of the NCP since its inception has been the extensive and continuous participation of the biomedical community in the major planning efforts of the NCI. Beginning with the development of the first edition of the National Cancer Program Plan in 1972, periodic planning sessions have been held for the purpose of revising and updating the major recommendations for research and control activities.

The general character of the Program has become increasingly the product of a more extensive and frequent interaction among Congress, the public, the biomedical community, and federal agencies. In particular, the consistent and active roles of the President's Cancer Panel and the National Cancer Advisory Board have established a model for effective and productive relationships between national advisory committees and the federal agency.

## NUMBER OF DEATHS FOR THE FIVE LEADING CANCER SITES BY AGE GROUP AND SEX—1975

# RESEARCH POSITIONS AT THE NATIONAL CANCER INSTITUTE<sup>1</sup>

The National Cancer Institute recognizes that one of the most valuable resources to be drawn upon in the fight against cancer is the wealth of scientific talent available in the U. S. and around the world. In an effort to attract and maintain the highest quality scientific staff, two personnel systems are used: the U. S. Civil Service System and the PHS Commissioned Corps. In addition, the Staff Fellowship Program and the NIH Visiting Program have been designed to meet special needs. Special programs are also available for those who qualify.

POSITION	ELIGIBILITY	ANNUAL SALARY	MECHANISM OF ENTRY
----------	-------------	---------------	--------------------

## I. CIVIL SERVICE

<b>A. Civil Service</b> (tenured)	Appropriate advanced education, experience and knowledge needed by NCI to conduct its programs	Minimum starting: Ph.D. – \$26,022 Physicians – \$33,825 Maximum: \$47,500	Civil Service Commission. Contact Director or Laboratory Chief in area of interest or the NCI Personnel Office.
--------------------------------------	--	---	---

## II. SPECIAL APPOINTMENT OF EXPERTS AND CONSULTANTS

<b>A. Special Appointment of Experts and Consultants</b> (non-tenured appointment which can be extended up to 4 years)	Applicants shall possess outstanding experience and ability as to justify recognition as authorities in their particular fields of activity.	Equivalent to the salary range of GS-13 through GS-18  Maximum: \$47,500	Recommendation by Division Directors. Final approval rests with the Director, NCI.
---	--	--	--

## III. USPHS COMMISSIONED CORPS

Associate Training Program including CORD residency deferment program (limited tenure, maximum 3 years) <sup>2</sup>			
<b>A. Clinical Associate</b>	Graduates of Medical Schools including Internship	Pay and allowances of Senior Assistant Surgeon or Surgeon of PHS Commissioned Corps	Apply to Clinical and Professional Education Section, Clinical Center, National Institutes of Health
<b>B. Research Associate</b>	Graduates of Medical Schools including Internship	Pay and allowances of Senior Assistant Surgeon or Surgeon of PHS Commissioned Corps	Apply to Clinical and Professional Education Section, Clinical Center, National Institutes of Health
<b>C. Staff Associate</b>	Graduates of medical and dental schools, or other doctoral qualifications	Pay and allowances of Senior Assistant Surgeon of PHS Commissioned Corps	Apply to Clinical and Professional Education Section, Clinical Center, National Institutes of Health
<b>D. Senior COSTEP Program (Medical)</b>	Senior Medical Students	Pay and Allowances of Junior Asst. Health Service Officer plus payment of tuition, fees and other necessary expenses. Candidates incur 2 year active duty obligation with PHS Commissioned Corps.	Apply to: Commissioned Personnel Operations Division, Parklawn Building, Room 4-35, 5600 Fishers Lane, Rockville, Maryland 20857

## IV. STAFF FELLOWSHIPS

<b>A. Staff Fellowships</b> (maximum 5 years)	Physician or other doctoral degree equivalent awarded within last 5 years, U. S. citizen or non-citizen eligible for naturalization within 4 years.	Staff Fellows Physicians \$19,740-26,175 Other Doctorates \$15,120-25,528 Senior Staff Fellows Physicians \$22,365-35,559 Other Doctorates \$19,740-28,623	Contact Director or Laboratory Chief in area of interest or the NCI Personnel Office.
--	---	---	---

**V. VISITING PROGRAM (limited tenure)<sup>3</sup>**

POSITION	ELIGIBILITY	ANNUAL SALARY	MECHANISM OF ENTRY
<b>A.</b> Visiting Fellow (maximum 3 years)	1-3 years postdoctoral education	Entrance stipend \$10,000-10,800  No dependency allowance provided	Contact Director or Laboratory Chief in area of interest.
<b>B.</b> Visiting Associates (1 year with renewals to end of project)	3+ years postdoctoral education with appropriate knowledge needed by NCI	\$15,090-23,734	Contact Director or Laboratory Chief in area of interest.
<b>C.</b> Visiting Scientist (duration of project)	6+ years postdoctoral education with appropriate unusual experience and knowledge needed.	\$21,883-208(g)	Contact Director or Laboratory Chief in area of interest.

**VI. CIVIL SERVICE SUMMER EMPLOYMENT PROGRAMS**

<b>A.</b> Summer Employment Examination Program	U. S. citizen, 18 years of age or older (16 if high school graduate).	GS-1-GS-4 Grade is based on educ. and/or exper.	For clerical positions, must take the Civil Service Summer Employment Exam. Apply to NCI prior to May 1. No exam is required for non-clerical pos. Applicants must apply to NCI by April 15.
<b>B.</b> Summer Graduate Program	College graduate, graduate student, faculty member, equivalent experience	GS-5-GS-12 Grade is based on educ. and/or exper.	Apply to NCI personnel office by April 15. No exam. required.
<b>C.</b> Stay-In-School Program	U. S. citizen, high school or college student, 16-21 yrs. of age who need earnings from employment to continue in school.	Salary is commensurate with duties assigned and qualifications.	Apply to NCI personnel Office. No deadline required for applying; however, no new appointments are made between May 1 and Aug. 30.
<b>D.</b> Summer Aid Program	U. S. citizen, 16-21 yrs. of age, economically disadvantaged.	Federal minimum wage.	If live in Md., apply to the Md. State Employment Service and if live in D. C., apply to the D. C. Manpower Administration.
<b>E.</b> The Federal Junior Fellowship Program	U. S. citizen and graduating high school senior in a public or private school in the Metro. Wash., D. C. area. Must be in upper 10% of grad. class, have applied for admission to an accredited college or univ. and need financial assistance to attend school.	GS-1-GS-4	Nominations are submitted directly to the C. S. Commission by high school principals or counselors.
<b>F.</b> Federal Summer Intern Program	College student who has completed 2 or more years and stands in upper 1/3 of class or grad. student who is in upper 1/2 of class	GS-4-GS-11	NIH requests nominations from colleges that have expressed an interest in this Program to the C.S.C.

**VII. SPECIAL PROGRAMS**

<b>A.</b> Research Fellow sponsored by organization other than NIH, PHS	Determined by sponsoring organization.	Established by sponsoring organization	Contact Director or Laboratory Chief in area of interest; also apply to sponsoring agency, e.g., American Cancer Society, Eleanor Roosevelt Cancer Foundation, Leukemia Society of America, Inc., etc.
<b>B.</b> COSTEP Program (operates year-round) Maximum 120 days per 12 month period	U. S. Citizen. Must have completed one year of study in a medical, dental, or veterinary school; or a minimum of two years of baccalaureate program in a health-related field such as engineering, nursing, pharmacy, etc. May be enrolled in a masters or doctoral program in a health-related field (designated by the Assistant Secretary for Health). Physical requirements of PHS Commissioned Corps. Plans to return to college.	Pay and allowance of a Commissioned Officer, Junior Asst. Grade	Apply to PHS Commissioned Corps, COSTEP SECTION, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.
<b>C.</b> Fogarty International Scholars	International reputation, productivity, demonstrated ability in biomedical field	\$30,000 per annum	Recommendation to Fogarty Center by Institute Director or Scientist. Contact Director in area of interest.

<sup>1</sup> Does not necessarily indicate that positions are currently available at the National Cancer Institute.

<sup>2</sup> Appointments are made upon intellectual attainment and demonstrated research interest and ability matched to NCI's needs.

<sup>3</sup> Under most circumstances, the various visiting programs are limited to non-citizens.

# CANCER CONTROL PROGRAM OBLIGATIONS — FISCAL YEARS 1973-1977

\*No Treatment, Rehabilitation and Continuing Care in FY 1973.

# REIMBURSEMENT TO NIH MANAGEMENT FUND FISCAL YEAR 1977

**TOTAL NIH SERVICES  
\$113,357,000**

CLINICAL CENTER
Employee Health Services
Service Functions
Social Work
Professional Services
Consultative Services
Admissions and Follow-up
Anesthesiology
Diagnostic X-Ray
Clinical Pathology
Blood Bank
Rehabilitation Service
Pharmacy Service
Medical Records
TV Engineering
Nursing Service
Patient Nutrition Service
Environmental Sanitation
Control
Laundry
Radiation Safety

**DISTRIBUTION OF NCI SERVICES  
\$26,817,000**

DIVISION OF RESEARCH GRANTS
Initial Scientific Review of Applications
Assignment of Research Grant Applications Among Institutes

\$904,000

DIVISION OF COMPUTER RESEARCH & TECHNOLOGY
Research & Development Program in Which Concepts & Methods of Computer Science Are Applied to Biomedical Problems (Services Are Rendered to the NIH Communities on a Fee-For-Service Basis).

\$10,814,000

OFFICE OF ADMINISTRATION
Division of Administrative Services
Division of Contracts and Grants
Division of Engineering Services
Division of Financial Management
Division of Management Policy
Division of Management Survey and Review
Division of Personnel Management

\$1,800,000

DIVISION OF RESEARCH SERVICES
Laboratory Aids
Animal Hospital
Media Preparation
Glassware Preparation
Comparative Pathology
Germ-free Animal Production
Biomedical Engineering and Instrumentation
Library Services
Medical Arts
Environmental Services

The Management Fund provides for the financing of certain common research supporting services and administrative activities which are required in the operating of NIH.

# NCI GRANTS ADMINISTRATION PROCESS — UNDER CANCER ACT OF 1971

**LEGEND:**
